INDEX TO AUTHORS.

A

Anderson, Arthur K., Honeywell, Hannah E., Santy, Albert C., and **Pedersen, Svend.** The composition of normal rat blood, 157

B

Ball, Eric G. The composition of pancreatic juice and blood serum as influenced by the injection of acid and base, 433

—. The composition of pancreatic juice and blood serum as influenced by the injection of inorganic salts, 449

—. See JOHNSTON and BALL, 643

Bills, Charles E., and **Wirick, Alice M.** Long time feeding experiments with activated ergosterol. I, 117

Biloon, Sol. See BRAND, HARRIS, and BILOON, 315

Block, Richard J. See VICKERY and BLOCK, 107

Bloor, W. R., Okey, Ruth, and **Corner, George W.** The relation of the lipids to physiological activity. I. The changes in the lipid content of the corpus luteum of the sow, 291

—. See OKEY, BLOOR, and CORNER, 307

Blunt, Katharine. See COONS and BLUNT, 1

Brand, Erwin, Harris, Meyer M., and **Biloon, Sol.** Cystinuria. The excretion of a cystine complex which decomposes in the urine with the liberation of free cystine, 315

Brown, Helen Bennett, and **Shohl, Alfred T.** Rickets in rats. XI. The alteration of calcium and phosphorus metabolism of normal and rickетic rats produced by irradiated ergosterol, 245

Buchwald, K. W. See CORI, CORI, and BUCHWALD, 375

Burr, George O., and **Burr, Mildred M.** On the nature and rôle of the fatty acids essential in nutrition, 587

Burr, Mildred M. See BURR and BURR, 587

C

Cady, Osman Horace, and **Luck, James Murray.** Studies in the chemistry of vitamin A, 743

Calvery, H. O. The isolation of adenosine from human urine, 263

Christman, A. A. Purine metabolism. III. Diet and caging as factors in the allantoin excretion of the rabbit, 477

Conant, James B., and **Tongberg, C. O.** The oxidation-reduction potentials of hemin and related substances. I. The potentials of various hemins and hematins in the absence and presence of pyridine, 733

Coons, Callie Mae, and **Blunt, Katharine.** The retention of nitrogen, calcium, phosphorus, and magnesium by pregnant women, 1

Cori, Carl F. See CORI, CORI, and BUCHWALD, 375

Cori, Gerty T., Cori, Carl F., and **Buchwald, K. W.** The mechanism of epinephrine action. V. Changes in liver glycogen and blood lactic acid after injection of epinephrine and insulin, 375

Corner, George W. See BLOOR, OKEY, and CORNER, 291

—. See OKEY, BLOOR, and CORNER, 307

Culhane, Kathleen. Does cabbage fed to rabbits increase serum calcium? A reply to Kapsinow and Underhill, 113

D

Deegan, John K. See HUBBARD and DEEGAN, 575

Dickson, Allan D. See LINK and DICKSON, 491

Doisy, Edward A., Veler, Clement D., and **Thayer, Sidney.** The preparation of the crystalline ovarian hormone from the urine of pregnant women, 499

E

Elvehjem, C. A. A note on the determination of iron in milk and other biological materials, 463

F

Fishberg, Ella H. The rate of disappearance of foreign sugar from the blood stream, 665

Folin, Otto. An improved method for the determination of uric acid in blood, 179

—. Unlaked blood as a basis for blood analysis, 173

Frear, Donald E. The adaptation of the Benedict-Denis method to the determination of sulfur in plants, 285

Friedemann, Theodore E. See SHAFFER and FRIEDEMANN, 345

G

Goss, Harold, and **Schmidt, Carl L. A.** Calcium and phosphorus metabolism in rats during pregnancy and lactation and the influence of the reaction of the diet thereon, 417

Greenwald, Isidor. The chemistry of Jaffe's reaction for creatinine. VI. A compound of picric acid with two molecules of creatinine. Its combinations with acid and alkali, 333

Gustus, Edwin L. See JACOBS and GUSTUS, 199

H

Harris, Meyer M. See BRAND, HARRIS, and BILOON, 315

Hart, E. B., Steenbock, H., Kline, O. L., and **Humphrey, G. C.** Dietary factors in-

fluencing calcium assimilation. XIII. The influence of irradiated yeast on the calcium and phosphorus metabolism of milking cows, 145

Hauge, Sigfred M. An inheritance study of the distribution of vitamin A in maize. II. Vitamin A in hybrid red maize, 161

— and **Trost, John F.** An inheritance study of the distribution of vitamin A in maize. III. Vitamin A content in relation to yellow endosperm, 167

Hodes, Horace L. See JONES, RAPOPORT, and HODES, 267

Honeywell, Hannah E. See ANDERSON, HONEYWELL, SANTY, and PEDERSEN, 157

Hubbard, Roger S., and **Deegan, John K.** Note on the action of the colon bacillus upon the non-glucose reducing substances in human blood, 575

Humphrey, G. C. See HART, STEENBOCK, KLINE, and HUMPHREY, 145

Hunscher, Helen A. Metabolism of women during the reproductive cycle. II. Calcium and phosphorus utilization in two successive lactation periods, 37

—. See MACY, HUNSCHER, MCCOSH, and NIMS, 59

—. See MACY, HUNSCHER, NIMS, and MCCOSH, 17

J

Jacobs, Walter A., and **Gustus, Edwin L.** The digitalis glucosides. IV. The correlation of gitoxigenin with digitoxigenin, 199

Johlin, J. M. The isoelectric point of gelatin and its relation to the minimum physical properties of gelatin, 231

Johnston, Charles G., and **Ball, Eric G.** Variations in inorganic constituents of the pancreatic juice during constant drainage of the pancreatic ducts, 643

Jones, James H., Rapoport, Milton, and **Hodes, Horace L.** The effect of irradiated ergosterol on thyroparathyroidectomized dogs, 267

Jones, Katharine. See FOLIN, 179

Jorpes, Erik. On the chemical composition of the islands of Langerhans in the monkfish (*Lophius piscatorius*, L.), 469

—. See LEVENE and JORPES, 389, 403

K

Kline, O. L. See HART, STEENBOCK, KLINE, and HUMPHREY, 145

Krafka, Joseph, Jr. Endogenous acid and hematopoiesis. II. Uric acid, reticulocytes, and erythrocytes after hemolysis by phenylhydrazine hydrochloride, 223

Kramer, Benjamin. See SHEAR and KRAMER, 677

Kuttner, Theodore, and **Lichtenstein, Louis.** Micro colorimetric studies. II. Estimation of phosphorus: molybdic acid-stannous chloride reagent, 671

L

Leavenworth, Charles S. See Vickery and Leavenworth, 129

Levene, P. A., and **Jorpes, Erik.** A method of separation of ribopolynucleotides from thymonucleic acid and on the conditions for a quantitative separation of the purine bases from the ribopolynucleotides, 389

— and —. On the structure of melibiose, 403

—, **Rothen, Alexandre, Steiger, Robert E.,** and **Osaki, Masao.** The relation of chemical structure to the rate of hydrolysis of ketopiperazines. II. Hydrolysis of ketopiperazines by alkali, 723

— and **Steiger, Robert E.** Studies on racemization. IX. Action of alkali on ketopiperazines. Action of hydrochloric acid on amino acids, peptides, and ketopiperazines, 703

Lewis, Howard B. See Stearns and Lewis, 93

—. See Wiley and Lewis, 511

Lichtenstein, Louis. See Kuttner and Lichtenstein, 671

Link, Karl Paul, and **Dickson, Allan D.** The preparation of *d*-galacturonic acid from lemon pectic acid, 491

Loebel, Robert O. See Richardson, Shorr, and Loebel, 551

—. See Shorr, Loebel, and Richardson, 529

Logan, Milan A. An apparatus for the evaporation of liquids in a test-tube, 761

Luck, James Murray. See Cady and Luck, 743

M

MacKay, Eaton M., and **MacKay, Lois Lockard.** Age and the effect of unusual diets, 765

MacKay, Lois Lockard. See MacKay and MacKay, 765

Macy, Icie G., Hunscher, Helen A., McCosh, Sylvia Schimmel, and **Nims, Betty.** Metabolism of women during the reproductive cycle. III. Calcium, phosphorus, and nitrogen utilization in lactation before and after supplementing the usual home diets with cod liver oil and yeast, 59

—, —, **Nims, Betty,** and **McCosh, Sylvia Schimmel.** Metabolism of women during the reproductive cycle. I. Calcium and phosphorus utilization in pregnancy, 17

Manske, Richard H. F. The occurrence of *D*-mannose in seaweed and the separation of *L*-fucose and *D*-mannose, 571

Mason, Harold L. A study of glutathione. II. The determination of reduced glutathione in tissues, 623

McCosh, Sylvia Schimmel. See Macy, Hunscher, McCosh, and Nims, 59

—. See Macy, Hunscher, Nims, and McCosh, 17

Milner, Harold W. See Smith and Spoehr, 755

Morgulis, Sergius. Studies on the inactivation of catalase.

II. Inactivation by ultraviolet radiation at different hydrogen ion concentrations, 75

N

Nims, Betty. See MACY, HUNSCHER, MCCOSH, and NIMS, 59

—. See MACY, HUNSCHER, NIMS, and MCCOSH, 17

O

Okey, Ruth, Bloor, W. R., and **Corner, George W.** The variations in the lipids of the uterine mucosa in the pig, 307

—. See BLOOR, OKEY, and CORNER, 291

Osaki, Masao. See LEVENE, ROTHEN, STEIGER, and OSAKI, 723

P

Pedersen, Svend. See ANDERSON, HONEYWELL, SANTY, and PEDERSEN, 157

R

Rapoport, Milton. See JONES, RAPOPORT, and HODES, 267

Richardson, Henry B., Shorr, Ephraim, and **Loebel, Robert O.** Tissue metabolism. II. The respiratory quotient of normal and diabetic tissue, 551

—. See SHORR, LOEBEL, and RICHARDSON, 529

Rothen, Alexandre. See LEVENE, ROTHEN, STEIGER, and OSAKI, 723

S

Santy, Albert C. See ANDERSON, HONEYWELL, SANTY, and PEDERSEN, 157

Schmidt, Carl L. A. See GOSS and SCHMIDT, 417

Shaffer, Philip A., and **Friedemann, Theodore E.** Sugar activation by alkali. I. Formation of lactic and saccharinic acids, 345

Shear, M. J., and **Kramer, Benjamin.** Composition of bone. IX. Equilibration of serum with dicalcium phosphate, 677

Shohl, Alfred T. See BROWN and SHOHL, 245

Shorr, Ephraim, Loebel, Robert O., and **Richardson, Henry B.** Tissue metabolism. I. The nature of phlorhizin diabetes, 529

—. See RICHARDSON, SHORR, and LOEBEL, 551

Shumaker, L. See MORGULIS, 75

Sinclair, Robert Gordon. The metabolism of the phospholipids. I. The influence of diet on the amount and composition of the phospholipid fatty acids in various tissues of the cat, 579

Smith, James H. C., and **Spoehr, H. A.** Carotene. I. The oxygen equivalent determined with potassium permanganate in pyridine solution, 87

— and —. Carotene. II. The volatile fatty acids obtained by the oxidation of carotene and xanthophyll, 755

Somogyi, Michael. A method

for the preparation of blood filtrates for the determination of sugar, 655
Spoehr, H. A. See SMITH and SPOEHR, 87, 755
Stearns, Genevieve, and **Lewis, Howard B.** The metabolism of sulfur. XVII. The rate of oxidation of ingested cystine in the organism of the rabbit, 93
Steenbock, H. See HART, STEENBOCK, KLINE, and HUMPHREY, 145
Steiger, Robert E. The formylation of amino acids, 695
—. See LEVENE, ROTHEN, STEIGER, and OSAKI, 723
—. See LEVENE and STEIGER, 703
Svedberg, Andrea. See FOLIN, 179

T

Thayer, Sidney. See DOISY, VELER, and THAYER, 499
Tilt, Jennie. The basal metabolism of young college women in Florida, 635
Tongberg, C. O. See CONANT and TONGBERG, 733
Trost, John F. See HAUGE and TROST, 167

V

Veler, Clement D. See DOISY, VELER, and THAYER, 499
Vickery, Hubert Bradford, and **Block, Richard J.** The basic amino acids of wool, 107
— and **Leavenworth, Charles S.** The behavior of cystine with silver salts, 129

W

Weber, C. J. A modification of Sakaguchi's reaction for the quantitative determination of arginine, 217
Whelan, Mary. A colorimetric method for the quantitative determination of nitrates and nitrites in biologic fluids, 189
Wiley, Frank H., and **Lewis, Howard B.** The action of nitrous acid on casein. II, 511
Wirick, Alice M. See BILLS and WIRICK, 117

INDEX TO SUBJECTS.

A

Acid(s):
Blood serum composition, injection influence (BALL) 433
Fatty. *See* Fatty acids.
Pancreatic juice composition, injection influence (BALL) 433
Adenosine:
Urine, isolation, human (CALVERY) 263
Age:
Diets, unusual, and, effect (MACKAY and MACKAY) 765
Allantoin:
Excretion, caging effect, rabbit (CHRISTMAN) 477
—, diet effect, rabbit (CHRISTMAN) 477
Amino acid(s):
Basic, wool (VICKERY and BLOCK) 107
Formylation (STEIGER) 695
Hydrochloric acid action (LEVENE and STEIGER) 703
Wool, basic (VICKERY and BLOCK) 107
Apparatus:
Evaporation, liquids in test-tube (LOGAN) 761
Arginine:
Determination, Sakaguchi's reaction for, modification (WEBER) 217
Assimilation:
Calcium, dietary factors influencing. XIII (HART, STEENBOCK, KLINE, and HUMPHREY) 145

B

Bacillus:
Colon, blood non-glucose reducing substances, action (HUBBARD and DEEGAN) 575
Basal metabolism:
Women (TILT) 635
Base(s):
Blood serum composition, injection influence (BALL) 433
Pancreatic juice composition, injection influence (BALL) 433
Benedict-Denis:
Sulfur determination, plants (FREAR) 285
Biological fluid:
Nitrates, determination, colorimetric (WHELAN) 189
Nitrites, determination, colorimetric (WHELAN) 189
Blood:
Analysis, unlaked blood as basis (FOLIN) 173
Composition, rat (ANDERSON, HONEYWELL, SANTY, and PEDERSEN) 157
Filtrates, sugar determination, preparation (SOMOGYI) 655

Blood—*continued:*
Lactic acid, epinephrine effect (Cori, Cori, and Buchwald) 375
— —, insulin effect (Cori, Cori, and Buchwald) 375
Non-glucose reducing substances, colon bacillus action (Hubbard and Deegan) 575
Reducing substances, non-glucose, colon bacillus action (Hubbard and Deegan) 575
Sugar determination, filtrates, preparation (Somogyi) 655
—, foreign, disappearance rate (Fishberg) 665
Unlaked, blood analysis basis (Folin) 173
Uric acid, determination (Folin) 179

Blood cell:
Red, hemolysis, phenylhydrazine hydrochloride (Krafka) 223

Blood serum:
Calcium, cabbage effect (Culhane) 113
Composition, acid injection influence (Ball) 433
—, base injection influence (Ball) 433
—, inorganic salts injection, influence (Ball) 449
Equilibration, dicalcium phosphate (Shear and Kramer) 677

Bone:
Composition. IX (Shear and Kramer) 677

C

Cabbage:
Blood serum calcium, effect (Culhane) 113
Calcium, blood serum, effect (Culhane) 113

Calcium:
Assimilation, dietary factors influencing. XIII (Hart, Steenbock, Kline, and Humphrey) 145
Blood serum, cabbage effect (Culhane) 113
Metabolism, ergosterol, irradiated, alteration (Brown and Shohl) 245
—, lactation, diet reaction influence (Goss and Schmidt) 417
—, pregnancy, diet reaction influence (Goss and Schmidt) 417
—, rickets, ergosterol, irradiated, alteration (Brown and Shohl) 245
—, yeast, irradiated, milking cows, effect (Hart, Steenbock, Kline, and Humphrey) 145
Retention, pregnancy (Coons and Blunt) 1
Utilization, lactation (Hunscher) 37
—, — (Macy, Hunscher, McCosh, and Nims) 59
—, —, cod liver oil supplement (Macy, Hunscher, McCosh, and Nims) 59

Calcium—*continued:*
Utilization, lactation, yeast supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, pregnancy (MACY, HUNSCHER, NIMS, and MCCOSH) 17
Carotene:
I (SMITH and SPOEHR) 87
II (SMITH and SPOEHR) 755
Fatty acids, volatile, oxidation (SMITH and SPOEHR) 755
Oxidation, fatty acids, volatile, from (SMITH and SPOEHR) 755
Oxygen equivalent determination, potassium permanganate in pyridine solution (SMITH and SPOEHR) 87
Carotin:
See Carotene.
Casein:
Nitrous acid action. II (WILEY and LEWIS) 511
Catalase:
Inactivation. II (MORGULIS) 75
—, ultra-violet radiation, different hydrogen ion concentrations (MORGULIS) 75
Cod liver oil:
Calcium utilization, lactation, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Lactation, calcium utilization, supplement (MACY HUNSCHER, MCCOSH, and NIMS) 59
Cod liver oil—*continued:*
Lactation, nitrogen utilization, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, phosphorus utilization, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Nitrogen utilization, lactation, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Phosphorus utilization, lactation, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Colon:
Bacillus, blood non-glucose reducing substances, action (HUBBARD and DEEGAN) 575
Colorimetric determination:
Micro. II (KUTTNER and LICHTENSTEIN) 671
Nitrates, biological fluids (WHELAN) 189
Nitrites, biological fluids (WHELAN) 189
Corn:
See also Maize.
Corpus luteum:
Lipid content, changes (BLOOR, OKEY, and CORNER) 291
Creatinine:
Jaffe's reaction, chemistry. VI (GREENWALD) 333
Picric acid compound with (GREENWALD) 333
Cystine:
Complex, urine (BRAND, HARRIS, and BILOON) 315

Cystine—*continued:*
Free, urine, cystine complex, relation (BRAND, HARRIS, and BILOON) 315
Oxidation rate, rabbit (STEARNS and LEWIS) 93
Silver salts, behavior with (VICKERY and LEAVENWORTH) 129
Cystinuria:
(BRAND, HARRIS, and BILOON) 315

D

Diabetes:
Phlorhizin, nature (SHORR, LOEBEL, and RICHARDSON) 529
Tissue, respiratory quotient (RICHARDSON, SHORR, and LOEBEL) 551
Dicalcium phosphate:
Blood serum equilibration with (SHEAR and KRAMER) 677
Diet:
Age, and unusual, effect (MACKAY and MACKAY) 765
Allantoin excretion, effect (CHRISTMAN) 477
Calcium assimilation, dietary factors influencing. XIII (HART, STEENBOCK, KLINE, and HUMPHREY) 145
Fatty acids, phospholipid, influence (SINCLAIR) 579
Phospholipid fatty acids, influence (SINCLAIR) 579
Diet—*continued:*
Reaction, calcium metabolism, lactation, influence (GOSS and SCHMIDT) 417
—, — —, pregnancy, influence (GOSS and SCHMIDT) 417
—, lactation, calcium metabolism, influence (GOSS and SCHMIDT) 417
—, —, phosphorus metabolism, influence (GOSS and SCHMIDT) 417
—, phosphorus metabolism, lactation, influence (GOSS and SCHMIDT) 417
—, — —, pregnancy, influence (GOSS and SCHMIDT) 417
—, pregnancy, calcium metabolism, influence (GOSS and SCHMIDT) 417
—, —, phosphorus metabolism, influence (GOSS and SCHMIDT) 417
Unusual, and age, effect (MACKAY and MACKAY) 765
Digitalis:
Glucosides. IV (JACOBS and GUSTUS) 199
Digitoxigenin:
Gitoxigenin, correlation (JACOBS and GUSTUS) 199

E

Endosperm:
Yellow, vitamin A content, maize, relation (HAUGE and TROST) 167

Epinephrine:
Action, mechanism. V (CORI, CORI, and BUCHWALD) 375
Blood lactic acid, effect (CORI, CORI, and BUCHWALD) 375
Glycogen, liver, effect (CORI, CORI, and BUCHWALD) 375
Lactic acid, blood, effect (CORI, CORI, and BUCHWALD) 375
Ergosterol:
Activated, feeding experiments. I (BILLS and WIRICK) 117
Irradiated, calcium metabolism (BROWN and SHOHL) 245
—, phosphorus metabolism (BROWN and SHOHL) 245
—, thyroparathyroidectomized dogs, effect (JONES, RAPOPORT, and HODES) 267
Rickets, calcium metabolism, irradiated (BROWN and SHOHL) 245
—, phosphorus metabolism, irradiated (BROWN and SHOHL) 245
Erythrocyte:
See Blood cell, red.

F

Fatty acid(s):
Carotene oxidation, volatile (SMITH and SPOEHR) 755
Nutrition, nature (BURR and BURR) 587
—, rôle (BURR and BURR) 587
Phospholipid, diet influence (SINCLAIR) 579
Fatty acid(s)—*continued:*
Volatile, carotene oxidation (SMITH and SPOEHR) 755
—, xanthophyll oxidation (SMITH and SPOEHR) 755
Xanthophyll oxidation, volatile (SMITH and SPOEHR) 755
Fish:
See also Monkfish.
Formylation:
Amino acids (STEIGER) 695
***L*-Fucose:**
D-Mannose separation, seaweed (MANSKE) 571

G

***d*-Galacturonic acid:**
Lemon pectic acid, preparation (LINK and DICKSON) 491
Preparation, lemon pectic acid (LINK and DICKSON) 491
Gelatin:
Isoelectric point, minimum physical properties, relation (JOHLIN) 231
Physical properties, minimum, isoelectric point, relation (JOHLIN) 231
Gitoxigenin:
Digitoxigenin, correlation (JACOBS and GUSTUS) 199
Glucose:
Non-, reducing substances, blood, colon bacillus action (HUBBARD and DEEGAN) 575
Glucoside:
Digitalis. IV (JACOBS and GUSTUS) 199

Glutathione:
II (MASON) 623
Reduced, determination, tissues (MASON) 623

Glycogen:
Epinephrine effect, liver (CORI, CORI, and BUCHWALD) 375
Insulin effect, liver (CORI, CORI, and BUCHWALD) 375
Liver, epinephrine effect (CORI, CORI, and BUCHWALD) 375
—, insulin effect (CORI, CORI, and BUCHWALD) 375

H

Hematin:
Oxidation-reduction potential, pyridine effect (CONANT and TONGBERG) 733

Hematopoiesis:
Uric acid, endogenous, and, II (KRAFKA) 223

Hemin:
Oxidation-reduction potential, pyridine effect (CONANT and TONGBERG) 733
— —. I (CONANT and TONGBERG) 733

Hormone:
Ovary, crystalline, preparation, urine, pregnant women (DOISY, VELER, and THAYER) 499

Hydrogen ion concentration:
Catalase inactivation at different, ultra-violet radiation (MORGULIS) 75

I

Inorganic constituents:
Pancreatic juice, pancreatic duct drainage (JOHNSTON and BALL) 643

Inorganic salt(s):
Blood serum composition, injection influence (BALL) 449
Pancreatic juice composition, injection influence (BALL) 449

Insulin:
Blood lactic acid, effect (CORI, CORI, and BUCHWALD) 375
Glycogen, liver, effect (CORI, CORI, and BUCHWALD) 375
Lactic acid, blood, effect (CORI, CORI, and BUCHWALD) 375

Iron:
Biological materials, determination (ELVEHJEM) 463
Determination, biological materials (ELVEHJEM) 463
—, milk (ELVEHJEM) 463
Milk, determination (ELVEHJEM) 463

Irradiation:
Ergosterol, calcium metabolism (BROWN and SHOHL) 245
—, phosphorus metabolism (BROWN and SHOHL) 245
—, rickets, calcium metabolism (BROWN and SHOHL) 245
—, —, phosphorus metabolism (BROWN and SHOHL) 245

Irradiation—*continued:*
Ergosterol, thyroparathyroidectomized dogs, effect (JONES, RAPOPORT, and HODES) 267
Yeast, calcium metabolism, milking cows (HART, STEENBOCK, KLINE, and HUMPHREY) 145
—, phosphorus metabolism, milking cows (HART, STEENBOCK, KLINE, and HUMPHREY) 145

Isoelectric point:
Gelatin, and minimum physical properties, relation (JOHLIN) 231

J

Jaffe:
Creatinine, chemistry. VI (GREENWALD) 333

K

Ketopiperazine:
Alkali action (LEVENE and STEIGER) 703
Chemical structure and hydrolysis rate, relation. II (LEVENE, ROTHEN, STEIGER, and OSAKI) 723
Hydrochloric acid action (LEVENE and STEIGER) 703
Hydrolysis, alkali (LEVENE, ROTHEN, STEIGER, and OSAKI) 723
— rate and chemical structure, relation. II (LEVENE, ROTHEN, STEIGER, and OSAKI) 723

L

Lactation:
Calcium metabolism, diet reaction influence (GOSS and SCHMIDT) 417
— utilization (HUNSCHER) 37
— — (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, cod liver oil supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, yeast supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Nitrogen utilization (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, cod liver oil supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, yeast supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Phosphorus metabolism, diet reaction influence (GOSS and SCHMIDT) 417
— utilization (HUNSCHER) 37
— — (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, cod liver oil supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
— —, yeast supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59

Lactic acid:
Blood, epinephrine effect (Cori, Cori, and Buchwald) 375
—, insulin effect (Cori, Cori, and Buchwald) 375
Formation from sugar by alkali (Shaffer and Friedemann) 345

Langerhans' islands:
Composition, monkfish (Jorpes) 469
Monkfish, composition (Jorpes) 469

Lemon:
Pectic acid, *d*-galacturonic acid preparation (Link and Dickson) 491

Lipid(s):
Corpus luteum, changes in content (Bloor, Okey, and Corner) 291
Physiological activity, relation. I (Bloor, Okey, and Corner) 291
Uterus, mucosa, variations (Okey, Bloor, and Corner) 307

Liver:
Glycogen, epinephrine effect (Cori, Cori, and Buchwald) 375
—, insulin effect (Cori, Cori, and Buchwald) 375

Lophius piscatorius:
See Monkfish.

M

Magnesium:
Retention, pregnancy (Coons and Blunt) 1

Maize:
Endosperm, yellow, vitamin A content relation (Hauge and Trost) 167
Vitamin A content, yellow endosperm, relation (Hauge and Trost) 167
— — distribution, inheritance. II (Hauge) 161
— — —, —. III (Hauge and Trost) 167
— —, hybrid red (Hauge) 161

***D*-Mannose:**
L-Fucose, separation, seaweed (Manske) 571
Seaweed, occurrence (Manske) 571

Melibiose:
Structure (Levene and Jorpes) 403

Metabolism:
Basal. *See* Basal metabolism.
Calcium, ergosterol, irradiated, alteration (Brown and Shohl) 245
—, lactation, diet reaction influence (Goss and Schmidt) 417
—, pregnancy, diet reaction influence (Goss and Schmidt) 417
—, rickets, ergosterol, irradiated, alteration (Brown and Shohl) 245
—, yeast, irradiated, milking cows, effect (Hart, Steenbock, Kline, and Humphrey) 145
Phospholipids. I (Sinclair) 579

Metabolism—*continued:*
Phosphorus, ergosterol, irradiated, rickets, alteration (Brown and Shohl) 245
—, lactation, diet reaction influence (Goss and Schmidt) 417
—, pregnancy, diet reaction influence (Goss and Schmidt) 417
—, rickets, ergosterol, irradiated, alteration (Brown and Shohl) 245
—, yeast, irradiated, milking cows, effect (Hart, Steenbock, Kline, and Humphrey) 145
Purine. III (Christman) 477
Reproductive cycle, women. I (Macy, Hunscher, Nims, and McCosh) 17
— —, —. II (Hunscher) 37
— —, —. III (Macy, Hunscher, McCosh, and Nims) 59
Sulfur. XVII (Stearns and Lewis) 93
Tissue. I (Shorr, Loebel, and Richardson) 529
—. II (Richardson, Shorr, and Loebel) 551

Milk:
Calcium metabolism, yeast, irradiated, effect on milking cows (Hart, Steenbock, Kline, and Humphrey) 145
Iron, determination (Elvehjem) 463

Milk—*continued:*
Phosphorus metabolism, yeast, irradiated, influence on milking cows (Hart, Steenbock Kline, and Humphrey) 145
Yeast, irradiated, calcium metabolism, milking cows, influence (Hart, Steenbock, Kline, and Humphrey) 145
—, —, phosphorus metabolism, milking cows, influence (Hart, Steenbock, Kline, and Humphrey) 145

Molybdic acid:
-Stannous chloride reagent, phosphorus determination (Kuttner and Lichtenstein) 671

Monkfish:
Langerhans' islands, composition (Jorpes) 469
Lophius piscatorius, Langerhans' islands, composition (Jorpes) 469

N

Nitrates:
Biological fluids, determination, colorimetric (Whelan) 189
Determination, colorimetric, biological fluids (Whelan) 189

Nitrites:
Biological fluids, determination, colorimetric (Whelan) 189
Determination, colorimetric, biological fluids (Whelan) 189

Nitrogen:
Retention, pregnancy (Coons and Blunt) 1
Utilization, lactation (Macy, Hunscher, McCosh, and Nims) 59
—, —, cod liver oil supplement (Macy, Hunscher, McCosh, and Nims) 59
—, —, yeast supplement (Macy, Hunscher, McCosh, and Nims) 59
Nitrous acid:
Casein, action. II (Wiley and Lewis) 511
Nucleic acid:
Thymo-, ribopolynucleotides separation (Levene and Jorpes) 389
Nucleotide:
Ribopoly-, purine bases, separation, quantitative (Levene and Jorpes) 389
—, thymonucleic acid, separation (Levene and Jorpes) 389
Nutrition:
Fatty acids, nature (Burr and Burr) 587
— —, rôle (Burr and Burr) 587

O

Oil:
Cod liver. *See* Cod liver oil.
Ovary:
Hormone, crystalline, preparation, urine, pregnant women (Doisy, Veler, and Thayer) 499
Oxidation-reduction:
Potential, hematins, pyridine effect (Conant and Tongberg) 733
—, hemin and related substances. I (Conant and Tongberg) 733
—, —, pyridine effect (Conant and Tongberg) 733
Oxygen:
Equivalent, carotene, determination (Smith and Spoehr) 87

P

Pancreas:
Duct drainage, juice, inorganic constituents (Johnston and Ball) 643
Juice composition, acid injection influence (Ball) 433
— —, base injection influence (Ball) 433
— —, inorganic salts injection, influence (Ball) 449
—, inorganic constituents, pancreatic duct drainage (Johnston and Ball) 643
See also Langerhans' islands.
Pectic acid:
d-Galacturonic acid preparation, lemon (Link and Dickson) 491
Lemon, *d*-galacturonic acid preparation (Link and Dickson) 491
Peptide:
Hydrochloric acid action (Levene and Steiger) 703

Phenylhydrazine hydrochloride:
Hemolysis, erythrocytes (KRAFKA) 223
—, reticulocytes (KRAFKA) 223
—, uric acid, endogenous, effect (KRAFKA) 223

Phlorhizin:
Diabetes, nature (SHORR, LOEBEL, and RICHARDSON) 529

Phospholipid:
Fatty acids, diet influence (SINCLAIR) 579
Metabolism. I (SINCLAIR) 579

Phosphorus:
Determination, micro colorimetric, molybdic acid-stannous chloride reagent (KUTTNER and LICHTENSTEIN) 671
Metabolism, ergosterol, irradiated, alteration (BROWN and SHOHL) 245
—, lactation, diet reaction influence (GOSS and SCHMIDT) 417
—, pregnancy, diet reaction influence (GOSS and SCHMIDT) 471
—, rickets, ergosterol, irradiated, alteration (BROWN and SHOHL) 245
—, yeast, irradiated, milking cows, effect (HART, STEENBOCK, KLINE, and HUMPHREY) 145
Retention, pregnancy (COONS and BLUNT) 1

Phosphorus—*continued:*
Utilization, lactation (HUNSCHER) 37
—, — (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, —, cod liver oil supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, —, yeast supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, pregnancy (MACY, HUNSCHER, NIMS, and MCCOSH) 17

Picric acid:
Creatinine compound with (GREENWALD) 333

Plant:
Sulfur, determination, Benedict-Denis method (FREAR) 285

Potential:
Oxidation-reduction, hemin and related substances. I (CONANT and TONGBERG) 733

Pregnancy:
Calcium metabolism, diet reaction influence (GOSS and SCHMIDT) 417
— retention (COONS and BLUNT) 1
— utilization (MACY, HUNSCHER, NIMS, and MCCOSH) 17
Magnesium retention (COONS and BLUNT) 1
Nitrogen retention (COONS and BLUNT) 1
Ovarian hormone, urine, preparation (DOISY, VELER, and THAYER) 499

Pregnancy—*continued:*
Phosphorus metabolism, diet reaction influence (Goss and Schmidt) 417
— retention (Coons and Blunt) 1
— utilization (Macy, Hunscher, Nims, and McCosh) 17
Urine, ovarian hormone preparation (Doisy, Veler, and Thayer) 499

Purine:
Bases, ribopolynucleotides, separation, quantitative (Levene and Jorpes) 389
Metabolism. III (Christman) 477

R

Racemization:
IX (Levene and Steiger) 703

Radiation:
Ultra-violet, catalase inactivation, different hydrogen ion concentrations (Morgulis) 75

Reduction:
Non-glucose reducing substances, blood, colon bacillus action (Hubbard and Deegan) 575

Reproduction:
Metabolism, women. I (Macy, Hunscher, Nims, and McCosh) 17
—, —. II (Hunscher) 37
—, —. III (Macy, Hunscher, McCosh, and Nims) 59

Respiratory quotient:
Diabetic tissue (Richardson, Shorr, and Loebel) 551
Tissue (Richardson, Shorr, and Loebel) 551
—, diabetic (Richardson, Shorr, and Loebel) 551

Reticulocyte:
Hemolysis, phenylhydrazine hydrochloride (Krafka) 223

Ribopolynucleotide:
Purine bases, separation, quantitative (Levene and Jorpes) 389
Thymonucleic acid, separation (Levene and Jorpes) 389

Rickets:
XI (Brown and Shohl) 245
Calcium metabolism, ergosterol, irradiated, alteration (Brown and Shohl) 245
Ergosterol, irradiated, calcium metabolism, alteration (Brown and Shohl) 245
—, —, phosphorus metabolism, alteration (Brown and Shohl) 245
Phosphorus metabolism, ergosterol, irradiated, alteration (Brown and Shohl) 245

S

Saccharinic acid:
Formation from sugar by alkali (Shaffer and Friedemann) 345

Sakaguchi:
Arginine determination by modified reaction of (WEBER) 217

Salt(s):
Inorganic. *See* Inorganic salts.

Seaweed:
L-Fucose, *D*-mannose, separation (MANSKE) 571
D-Mannose, *L*-fucose, separation (MANSKE) 571
—, occurrence (MANSKE) 571

Stannous chloride:
Molybdic acid-, reagent, phosphorus determination (KUTTNER and LICHTENSTEIN) 671

Sugar:
Activation by alkali. I (SHAFFER and FRIEDEMANN) 345
Alkali, lactic acid formation, relation (SHAFFER and FRIEDEMANN) 345
—, saccharinic acid formation, relation (SHAFFER and FRIEDEMANN) 345
Blood, determination, filtrate preparation (SOMOGYI) 655
—, foreign, disappearance rate (FISHBERG) 665
Determination, blood, filtrate preparation (SOMOGYI) 655
Foreign, blood, disappearance rate (FISHBERG) 665

Sugar—*continued:*
Lactic acid formation, alkali on (SHAFFER and FRIEDEMANN) 345
Saccharinic acid formation, alkali on (SHAFFER and FRIEDEMANN) 345

Sulfur:
Determination, plants, Benedict-Denis method (FREAR) 285
Metabolism. XVII (STEARNS and LEWIS) 93

T

Thymonucleic acid:
Ribopolynucleotides separation (LEVENE and JORPES) 389

Thyroparathyroidectomy:
Ergosterol, irradiated, effect following (JONES, RAPOPORT, and HODES) 267

Tissue:
Diabetic, respiratory quotient (RICHARDSON, SHORR, and LOEBEL) 551
Fatty acids, phospholipid, diet influence (SINCLAIR) 579
Glutathione, reduced, determination (MASON) 623
Metabolism. I (SHORR, LOEBEL, and RICHARDSON) 529
—. II (RICHARDSON, SHORR, and LOEBEL) 551
Phospholipid fatty acids, diet influence (SINCLAIR) 579

Tissue—*continued:*
Respiratory quotient (Richardson, Shorr, and Loebel) 551
— —, diabetic (Richardson, Shorr, and Loebel) 551

U

Ultra-violet:
Radiation, catalase inactivation, different hydrogen ion concentrations (Morgulis) 75

Uric acid:
Blood, determination (Folin) 179
Determination, blood (Folin) 179
Endogenous, hematopoiesis and. II (Krafka) 223
—, hemolysis, phenylhydrazine hydrochloride, effect (Krafka) 223
Hematopoiesis and, endogenous. II (Krafka) 223

Urine:
Adenosine isolation, human (Calvery) 263
Cystine complex (Brand, Harris, and Biloon) 315
—, free, cystine complex, relation (Brand, Harris, and Biloon) 315
Ovarian hormone, preparation, pregnant women (Doisy, Veler, and Thayer) 499
Pregnant women, ovarian hormone preparation (Doisy, Veler, and Thayer) 499

Uterus:
Lipids, mucosa, variations (Okey, Bloor, and Corner) 307

V

Vitamin(s):
A, chemistry (Cady and Luck) 743
—, distribution in maize, inheritance. II (Hauge) 161
—, — — —, inheritance. III (Hauge and Trost) 167
—, maize content, yellow endosperm, relation (Hauge and Trost) 167
—, —, hybrid red (Hauge) 161

W

Wool:
Amino acids, basic (Vickery and Block) 107

X

Xanthophyll:
Fatty acids, volatile, oxidation (Smith and Spoehr) 755
Oxidation, fatty acids, volatile, (Smith and Spoehr) 755

Y

Yeast:
Calcium utilization, lactation, supplement (Macy, Hunscher, McCosh, and Nims) 59
Irradiated, calcium metabolism, milking cows, effect (Hart, Steenbock, Kline, and Humphrey) 145

Yeast—*continued:*
Irradiated, phosphorus metabolism, milking cows, effect (HART, STEENBOCK, KLINE, and HUMPHREY) 145
Lactation, calcium utilization, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
—, nitrogen utilization, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Yeast—*continued:*
Lactation, phosphorus utilization, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Nitrogen utilization, lactation, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
Phosphorus utilization, lactation, supplement (MACY, HUNSCHER, MCCOSH, and NIMS) 59
